

Music

Curriculum Principles

By the end of their secondary education, a student of music at Dixons Broadgreen will:

- Have the knowledge and experience to listen to, compose and perform music to express themselves.
- Have a lifetime love of music and understanding of its many genres.

Music is all around us. It is the soundtrack to our lives. At Dixon's Broadgreen Academy, we encourage our students to use music as a vessel to express themselves, whilst understanding the key fundamental skills to compose, perform and analysis music. They will develop a lifetime love of music.

In order to achieve a true understanding of music, topics have been intelligently sequence based on the following rationale:

- Performance, composing, listening and music technology delivered through a spiral which will be revisited and help develop skills.

The music curriculum will address social disadvantage by addressing gaps in students' knowledge and skills:

- Group work, Independent learning and experiencing a wide range of musical genres.

We fully believe music can contribute to the personal development of students at DBA:

- Cultural capital
- Empathy and respect
- Pupil engagement, enjoyment and the need to work hard to progress

At KS3, KS4 and KS4, our belief is that homework should be interleaved revision of powerful knowledge that has been modelled and taught in lessons. This knowledge is recalled and applied through a range of low stakes quizzing and practice.

Opportunities are built in to make links to the world of work to enhance the careers, advice and guidance that students are exposed to:

- Music studio / concerts / performances / enrichment / Whole school ethos / Practitioners
- Links with music hub and likeminded pupils across the city.

A true love of music involves learning about various cultural domains. We teach beyond the specification requirements, but do ensure students are well prepared to be successful in Level 2 examinations:

- Lots of performance and showcase opportunities
- World Music experiences
